***P3a. Description:** This property includes two small businesses, in what appear to have originally been residential buildings, and an outbuilding. They are set on a lot that is mostly paved parking but supports some native trees. Building A is a small one-story L-plan wood frame house. It has a cross-gable roof with exposed rafters and open eaves, clad with standing seam metal. The building is sheathed with wood lap siding. Original windows are wood 1/1 double-hung, but both windows on the front façade have been replaced with fixed single light windows. The door is clad with wood V-rustic siding. The house has a recent (c.1990s) picket fence and trellis entry bearing the business sign. (continued)

B9a. Architect: Unknown

b. Builder: Unknown

*B10. Significance: Theme

Area

Period of Significance

Property Type

Applicable Criteria None

The resource appears to be associated with the pre-World War II period when the Lake Tahoe basin was becoming popular as a weekend retreat and vacation destination. The resource has no known association with persons or events that made a significant contribution to local, state, or national history and does not appear to be eligible for listing in the National Register of Historic Places under criteria A or B. The resource is an unremarkable example of a small vacation cottage. Application of new windows and roof material on buildings A and B has caused a loss of integrity of design, materials, and workmanship. The pump house retains its integrity of design, materials, and workmanship, since it appears to be unmodified since original construction. Thus, the resource does not appear to be eligible under Criterion C. The resource was evaluated in accordance with Section 15064.5(a)(2)-(3) of the CEQA Guidelines, using criteria outlined in Section 5024.1 of the California Public Resources Code, and determined not to be a historical resource for purposes of CEQA. Finally, the resource was evaluated in accordance with Section 29 of the Tahoe Regional Planning Agency's Code of Ordinances, and determined not to be a historic resource as defined therein.

P3a.

Building B is a 1½-story rectangular plan wood frame house. It has a side gable roof with open eaves and fascia, clad with standing seam metal roofing. Walls are sheathed with wood lap siding. All visible windows are fixed single light. The door is clad with wood V-rustic siding. An open porch with simple railings and cobble foundation extends the width of the main facade

Adjacent to Building B is what appears to be a pump house. It is one-story, rectangular in plan, and of wood frame construction. It has a hip roof with open eaves and exposed rafters, clad with milled wood shingles. Walls are low and sheathed with wood V-rustic siding, as is the door. The window has been boarded over.

B9a. Architect: Unknown

b. Builder: Unknown

*B10. Significance: Theme Automobile Recreation / Tourism

Area Lake Tahoe

Period of Significance 1950 - 1960

Property Type Motel

Applicable Criteria C

The building does not appear to meet National Register Criterion A at the local level of significance. Although it is associated with an event important in history, the development of automobile recreation and tourism at Lake Tahoe from 1950 to 1960, it is a late and typical example with no strong particular historic associations. It does not appear to meet national Register Criterion B since there is no known association with a significant person. The building appears to be eligible based on National Register Criterion C, California Register Criterion 3, and TRPA Criterion C. The property is a locally exceptional representative of a resort court design that makes use of Mountain Rustic stylistic elements. This building is typical of small resorts built to cater to the automobile trade on highways in the Tahoe Basin following World War II. Although it is similar in scale and function to a post-war strip-motel, its overall style suggests heavy borrowing from the kind of rustic lodge design found in national parks. Small motels with this degree of integrity are rare in the Tahoe Basin and are rapidly disappearing due to development pressure. Historic property boundaries are coincident with the assessor's parcel boundaries. Its period of significance is 1950-1960. Character-defining features include the setting, scale, use of Craftsman elements, windows, siding, and overall design. Noncontributing elements include a door, some windows, fireplace, and porch railings. This building retains a high degree of integrity of location, design, setting, materials, workmanship, feeling, and association since it and its lot appear to be fairly unmodified since the period of significance. Motels with this degree of integrity are also rare due to a strong tendency to modernize exteriors through time. (continued)

***P3a. Description:** This property is a complex of buildings including the motel office, four blocks of rental units, a utility building, and a pool with associated covered patio and rooftop deck. Only two blocks of rooms (buildings A and B) are within the project area. These two buildings are on the half of the property adjacent to North Lake Boulevard. The remaining buildings and pool are on the rear half of the property, fronting Brockway Vista Avenue. The buildings include a one-story office building, one-story utility building, two-story block of units in the southeast corner, and a large L-plan one and two-story block of rooms on the southwest side of the property. All of these buildings have been extensively remodeled including all doors and windows. Most of the lot is covered by paved parking but a few native trees have survived.

Building B is a one-story rectangular plan wood frame building. It has a side gable roof with open eaves and gable ends partly covered by a recent fascia. A recent porch supported by simple posts extends along the entire east side of the building. Walls are sheathed with painted wood V-rustic siding. Recent contrasting trusswork trim has been added to the gable end. Windows are aluminum sliders and the doors are recent flush. A small shed has been added to the south end of the building.

B1. Historic Name: Stevenson's Holliday Inn

B2. Common Name: Stevenson's Holliday Inn

B3. Original Use: Motel

B4. Present Use: Motel

*B5. Architectural Style: Mixed

*B6. Construction History: The property is identified by name on the 1947 Smith map. It appears in telephone directories starting in 1948 advertising "sleeping cabins" with Robert F. Stevenson as proprietor. Assessor's data appear to reflect the more modern strip motel blocks with a Year Built of 1954 and an Effective Year of 1955. All of the buildings on the property reflect modernization of exteriors, including window and door replacements. Building A is so thoroughly modern looking that it is likely built after 1956. If built earlier, all windows, doors, and siding have been replaced and a false mansard roof added. Building B is over 50 years old but has been modified with porch and shed additions, windows, doors and gable trim. Dates of the various additions are not known.

***P3a. Description:** This building is a one and two-story L-plan cinder block motel. As originally built, it was one-story with all walls made of cinder blocks with rounded corners. It has a gable roof with open eaves and exposed rafters, clad with composition shingles. Gable ends are clad with stained wood V-rustic siding. Original windows are metal casement, but many have been replaced with aluminum sliders. Doors are flush. The entire second story is a gabled addition, clad with plywood T1-11 siding. It has aluminum sliding windows and patio doors and a cinder block chimney. At the north end of the building is a second addition. This is one-story with a flat roof that doubles as a deck. It has milled shingle siding, aluminum sliders, and peeled log railings. A third addition is a shed-roofed enclosed entry porch. The original porch above entries all along the rear of the building is supported by pillars made of rounded-corner cinder blocks. There is a concrete pool at the northeast corner of the property. Cinderblock and cobble retaining walls and planters have been added. A few native trees survive at the rear of the lot. The sign is recent (c.1990s).

Period of Significance

Property Type

Applicable Criteria None

The resource is associated with the period just before World War II when the Lake Tahoe basin was becoming popular as a weekend retreat and vacation destination. The resource has no known association with persons or events that made a significant contribution to local, state, or national history and does not appear to be eligible for listing in the National Register of Historic Places under criteria A or B. The resource is an unremarkable example of its type. Additions and application of new windows, and new doors has caused a loss of integrity of design, materials, and workmanship, and severely compromised integrity of feeling and association. Thus, the resource does not appear to be eligible under Criterion C. The resource was evaluated in accordance with Section 15064.5(a)(2)-(3) of the CEQA Guidelines, using criteria outlined in Section 5024.1 of the California Public Resources Code, and determined not to be a historical resource for purposes of CEQA. Finally, the resource was evaluated in accordance with Section 29 of the Tahoe Regional Planning Agency's Code of Ordinances, and determined not to be a historic resource as defined therein.

***P3a. Description:** This property contains a commercial building and an apartment block. The lot is paved. One native tree survives. Building A is a one-story irregular-plan wood frame commercial building. It has a cross-gable roof with open eaves and exposed rafters, clad with steel and aluminum panels. Walls on the front (north) side of the building are sheathed with asbestos cement shingles. Board-and-batten siding is used on the gable end and on the lower portion of the wall. The west end of the building is sheathed in wood lap siding. The south side of the building is sheathed with wood V-rustic siding. Original windows are fixed with eight lights and wood 1/1 double-hung. Recent (c.1990s) windows include fixed and aluminum sliders. Doors are recent flush and aluminum-framed glass. A recent (c.1990s) cinder block addition with flat roof is at the rear. A gabled hood with exposed truss protects the entry.

Building B is a two-story rectangular plan wood frame apartment building. It has a side-gable roof with exposed rafters and open eaves, clad with recent aluminum panels. The building has a full-length covered porch supported by simple posts with vertical board railing. Walls are clad with painted wood lap and V-rustic siding. Windows are wood 1/1 double-hung, some of which are covered with metal storm windows or temporary plastic sheets.

The resource is associated with the post-World War II period when the Lake Tahoe basin was becoming popular as a weekend retreat and vacation destination. The resource has no known association with persons or events that made a significant contribution to local, state, or national history and does not appear to be eligible for listing in the National Register of Historic Places under criteria A or B. The resource is an unremarkable example of its type. An addition, along with application of new siding, new windows, and new doors to Building A has caused a loss of integrity of design, materials, and workmanship. Building B retains its integrity of design, materials, and workmanship since it appears to be nearly unmodified since original construction. It is a minor and undistinguished, example of this style as applied to a basic apartment building. Thus, the resource does not appear to be eligible under Criterion C. The resource was evaluated in accordance with Section 15064.5(a)(2)-(3) of the CEQA Guidelines, using criteria outlined in Section 5024.1 of the California Public Resources Code, and determined not to be a historical resource for purposes of CEQA. Finally, the resource was evaluated in accordance with Section 29 of the Tahoe Regional Planning Agency's Code of Ordinances, and determined not to be a historic resource as defined therein.

The resource is associated with the post-World War II period when the Lake Tahoe basin was becoming popular as a weekend retreat and vacation destination. The resource has no known association with persons or events that made a significant contribution to local, state, or national history and does not appear to be eligible for listing in the National Register of Historic Places under criteria A or B. The resource is an unremarkable example of its type. This building is in excellent condition, but its integrity of setting, feeling, and association is severely degraded by the fact that it was constructed as an ancillary building for the adjacent service station, which due to fire and partial dismantling no longer appears significant. Thus, the resource does not appear to be eligible under Criterion C. The resource was evaluated in accordance with Section 15064.5(a)(2)-(3) of the CEQA Guidelines, using criteria outlined in Section 5024.1 of the California Public Resources Code, and determined not to be a historical resource for purposes of CEQA. Finally, the resource was evaluated in accordance with Section 29 of the Tahoe Regional Planning Agency's Code of Ordinances, and determined not to be a historic resource as defined therein.

B1. Historic Name: Brockway Pines Cottages/Motel

B2. Common Name: Brockway Pines

B3. Original Use: Residence - Motel (auto court)

B4. Present Use: Residence, Retail Stores

*B5. Architectural Style: Minimal Traditional with Rustic elements

*B6. Construction History: Assessor's Year Built: Ranges from 1926-1962. Buildings D and E are shown on the 1936 Hwy map. "Brockway Pines Cottages" Mulford K. Miles, proprietor is listed in the 1946 phone book. The business under this name continues to be advertised in phone books for 1952 through 1955 (later years not checked). This suggests the property evolved from two individual residences to a cottage complex. Evolution continued with extensive remodels (c.1990s) of all buildings except F. The Brockway Pines Motel sign is in very poor condition, indicating many years since the place operated as a motel.

P3a.

Building A is a one-story wood frame house made by linking two smaller rectangular-plan houses with a small gabled addition. The north half of the building is clad with natural cedar log cabin siding that retains its bark. Windows are paired 6-light casement. Doors are made of vertical wood planks. A low open porch runs along the principal façade. The roof is side-gabled, clad with milled wood shingles and pierced by a metal chimney near the ridgeline. Eaves were originally open, with exposed rafter tails. A fascia and a rain gutter have been added to the front only.

The south half of the building is clad with plywood siding and battens (these continue onto the addition). Windows are metal sliders and the doors are flush wood. It has a side-gabled roof clad with milled wood shingles. Rafter tails are concealed by a fascia.

Building B is a one-story wood frame house matching the description for the north half of Building A except that the windows have been replaced with metal sliders.

Building C is a one-story wood frame house matching the description for the south half of Building A except that the door is 6-panel. It has an open concrete porch on the east side.

Building D is a one-story wood frame house with plywood and batten siding. Windows include wood double-hung with lambs-tongue drops and metal sliders. Doors are plank and glass. The jerkin-head roof is clad with milled wood shingles. Rafter tails are covered by fascia. The external stone rubble chimney penetrates one of the jerkin-heads. Open decks are outside both the front and rear entrances. The western third of the building appears to be an addition. This and the other jerkin-head building (E) appear to match the buildings shown on the 1936 Highway map and are likely the original buildings on the property.

Building E is a one-story rectangular wood frame house with a two-story addition. The original house is distinguished by its jerkin-head roof with enclosed eaves and composition shingles. The addition has a gable roof with fascia clad with wood shake shingles. It has a second-story open porch with X-braced rails. The entire building is clad with plywood with battens and composition lap siding. Windows are metal sliders. Doors are of varied design including wood panel, some with glazing.

Building F is a one-story rectangular wood frame house with milled log-cabin siding. It has a side-gable roof with fascia, clad with milled wood. A stovepipe penetrates the roof near the ridgeline. Windows are wood 1/1 double-hung with lambs-tongue drops and paired four light wood casement. The door is recent flush. The open front porch has simple posts and railings.

P.M.9.19/10.27, D.P. 14.79/16.53, EA 03-OC9300; MACTEC Project No. 56768.05B-C

Dear NAHC:

MACTEC Engineering and Consulting is completing archaeological and historical architecture inventories of the Kings Beach Commercial Core Improvement Project for Placer County, California. The cultural resource aspects of this project started in 2001. The project is designed to alleviate traffic flow and parking issues within Kings Beach near State Route 28 and includes various improvements such as highway redesign, off highway parking, and erosion control features. This area is illustrated on the Kings Beach Vicinity and Location Map as the area within the labeled Project Area Boundary (Figure 1). This map is taken from the USGS Kings Beach 7.5" quadrangle.

We are requesting a record search of the sacred land file to indicate the presence or absence of Native American cultural resources located within and adjacent the immediate Project Area Boundary also considered the Area of Potential Effect.

We are also asking your office to provide us with a contact list of Native American individuals and/or organizations that may have direct knowledge of Native American heritage resources located within the Project Area Boundary or immediate vicinity.

This effort will be reviewed by Caltrans/FHWA and TRPA as part of the Section 106 requirements for those agencies.

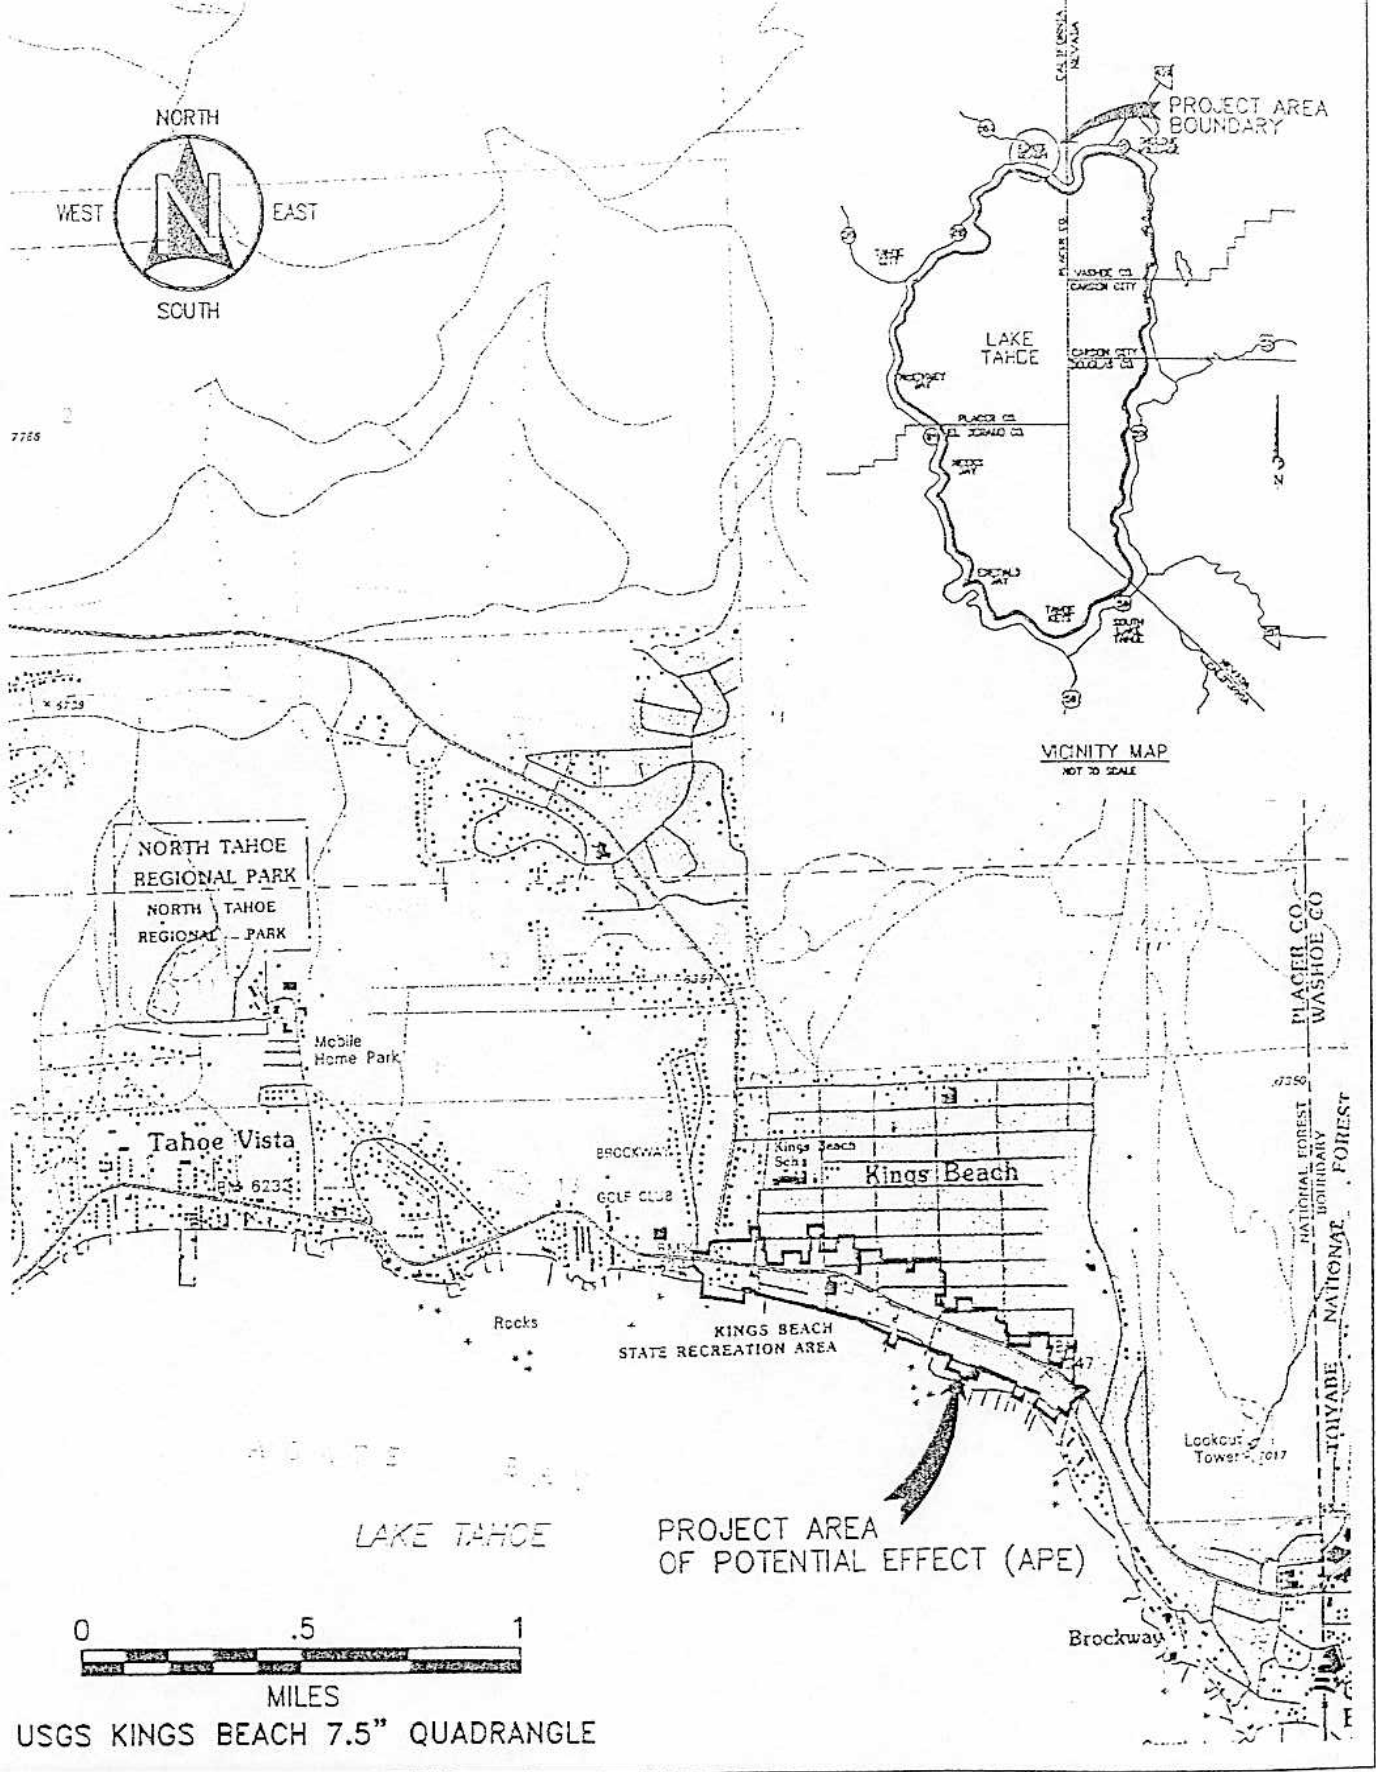

We look forward to your response. If you have any questions or comments, please do not hesitate to contact me or Bill Reich.

Sincerely,

Vickie L. Clay, RPA

RE: Proposed King Beach Commercial Core Improvement project, Placer County..

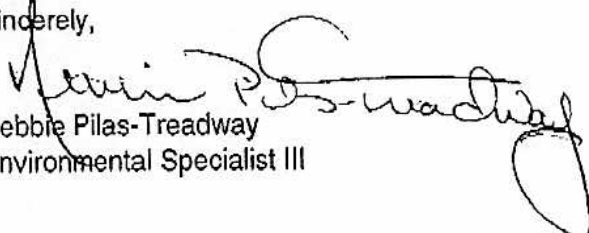

Dear Ms. Clay:

A record search of the sacred land file has failed to indicate the presence of Native American cultural resources in the immediate project area. The absence of specific site information in the sacred lands file does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Enclosed is a list of Native Americans individuals/organizations who may have knowledge of cultural resources in the project area. The Commission makes no recommendation or preference of a single individual, or group over another. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated, if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe or group. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from any of these individuals or groups, please notify me. With your assistance we are able to assure that our lists contain current information. If you have any questions or need additional information, please contact me at (916) 653-4038.

Sincerely,

Debbie Pilas-Treadway

RE: Proposed Kings Beach Commercial Core Improvement Project, Placer County

Dear Ms. Enos:

Placer County Department of Public Works in cooperation with the California Department of Transportation (Caltrans), the Federal Highway Administration (FHWA), and the Tahoe Regional Planning Agency (TRPA), is proposing to make improvements to State Route 28 including roadway redesign, off road parking, and erosion control features within the town of Kings Beach (map attached). As a result of proposed construction, there may be a potential for this project to affect sites that are important to the local Native American community.

Your name was given to us by the California Native American Heritage Commission (NAHC) as a representative of the local Native American community who may have knowledge and/or concerns about Native American heritage resources in the project area. A search of the sacred land file by the NAHC has failed to indicate the presence of Native American sacred sites located in the immediate project area. If you are aware of any sites in this area that you feel are in danger of being affected by the proposed project, please contact me at your earliest convenience (775) 888-9992 x226. Thank you for assisting us in this matter.

Sincerely yours,

Vickie L. Clay, RPA

RE: Washoe Cultural Review of the Draft Cultural Resources Survey Report for the
Kings Beach Commercial Core Improvement Project, Placer County, California

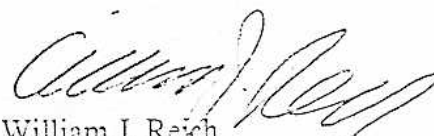

Dear Mr. Wallace:

Placer County has requested we provide you with a copy of MACTEC's draft Cultural Resources Survey Report for the Kings Beach Commercial Core Improvement Project in Placer County, California for review. This project has evolved in boundary and scope since 2001, thus the results presented represent three survey phases.

I have provided the draft copy to William Dancing Feather for Cultural Resource Review and comment. If you have any questions or comments, do not hesitate to call me. We look forward to comments from the Washoe Tribe.

Sincerely,

Vickie L. Clay, MS, RPA

Washoe Tribe of Nevada and California

Dear Bill,

I was wondering if you or Brian Wallace had any comments on MACTEC'S *Draft Cultural Resources Survey Report for the Kings Beach Commercial Core Improvement Project, Placer County, California* that I forwarded to you with a letter dated June 15, 2005. Your Name and that of Brian Wallace was provided by the California Native American Heritage Commission (NAHC) as a representative of the local Native American community who may have knowledge and/or concerns about Native American heritage resources in the Project Area. A search of the sacred land file by the NAHC has failed to indicate the presence of Native American sacred sites located in the immediate Project Area. If you are aware of any sites in this area that you feel are in danger of being affected by the proposed project, please contact me at 775-888-9992 x226. Thank you for your assistance regarding this matter.

Follow Up Native American Consultation Phone Calls December 8, 2005

By Vickie Clay, MACTEC Cultural Resource Program Director

Rose Enos (Maidu, Washoe)—Contacted by telephone on December 8, Ms. Rose Enos had received our letter, but had no concerns in Kings Beach unless burials were encountered during construction. I told her we had found one milling feature in an area that will not be disturbed. She had no issues with regard to the project unless burials are encountered.

William Dancing Feather (Washoe Cultural Coordinator)—Mr. Dancing Feather had received our letter, and he and I briefly discussed the project on a site visit in Carson City, Nevada on November 4, 2005. At that time he saw no issues with the Kings Beach project or the draft archaeological report he was given relating to this project. On December 8, 2005, I left him a message to corroborate the earlier discussion.

Brian Wallace (Washoe Tribal Chairman)—William Dancing Feather had directed me to send a letter to Brian Wallace informing him that MACTEC was sending an archaeological report to Mr. Dancing Feather for review, concerns, and issues. On December 8, 2005, I left a message with Mr. Wallace to ask if he or Mr. Dancing Feather had or knew of any concerns with the Kings Beach project.

Dear Historical Society:

On August 22, 2005, I sent a letter and map requesting any information or concerns your group might have regarding the Kings Beach Commercial Core Improvement Project for Placer County Department of Public Works. The project is designed to alleviate traffic flow and parking issues within the town of Kings Beach. Highway redesign, off highway parking, and erosion control features are planned. This effort will be reviewed by Caltrans/FHWA and TRPA as part of the Section 106 requirements for those agencies. I would appreciate any comments you might have regarding this project. Thank you for assisting us with this matter.
